Subject: SWHS Polyvision Board Fix??

We are aware of some SWHS teachers who use Macbooks having trouble with their CFF Polyvision Boards.

We were wondering if the problem was that the Polyvision driver installed on our Macbook over the summer was the one for the Eno board and not for the Walk and Talk model. Perhaps they are different drivers?

We tried trashing the Polyvision Driver folder from the Applications and downloaded the driver from this page:
<http://www.polyvision.com/support/downloads>

Search Downloads

Filter By Product:	Walk-and-Talk	▼
Filter By Type:	Drivers	▼
Filter By Operating System:	MAC	▼
Filter By Language:	<All>	▼

After running the installer and connecting the board it seems the boards are now working. We are not sure if this was the real issue, but it seems to fix it!

Driver link:

<http://www.polyvision.com/Portals/0/support/drivers/Mac%202.2.1%20English.zip>

Make sure you put in work orders if your Polyvision Board is not working so we can troubleshoot the problem and get you back up and running!
