

## Study Island Tip

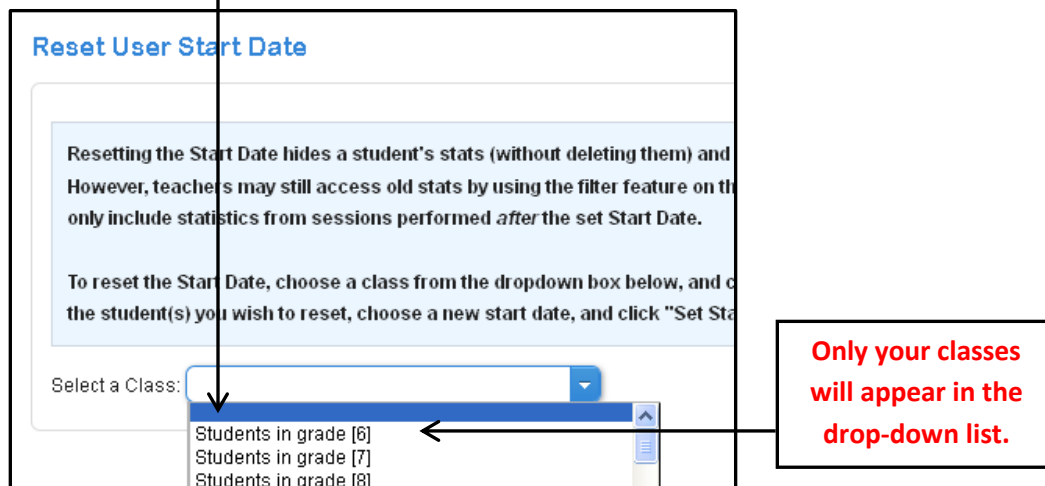

**Question:** How do I hide students' stats (*without deleting them*) from previous work to force a fresh start in the program?

**Answer:** Reset the start date for a class.

1. Click on **Teacher Page** and then **Reset Start Date**

2. Choose the appropriate **class** from the drop-down menu (*you will only see your classes*).

3. Data for students' prior work can be accessed in entirety or **filtered based on the dates** entered in the School Report Options screen.

4. Student assignments are typically only deleted when:
  - a. Technical issues interfered with performance.
  - b. Previous assignments prevent a student from earning a proficient level even after multiple attempts.
